CONSUMER AND MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 17 No. 27

Independence, Missouri 64050

WEEKLY  
SUMMARY  
AND  
STATISTICS

July 3, 1969

## GRAIN PRICES MOSTLY LOWER

Cash grain prices were mostly unchanged to lower for the week ended July 2. Oats and soybeans closed slightly higher. The domestic marketing certificates for eligible 1969-crop wheat were fixed at \$1.52 per bushel on the basis of the July parity price. This is 14¢ more than for the 1968 crop. Payments will be made on 43 percent of the acreage allotment compared with 40 percent for the previous crop.

Winter wheat declined 1¢ to 3¢ per bushel at most markets reflecting in part the increased harvesting of new wheat. The larger decline was in ordinary protein wheat. A strong mill interest advanced prices 1¢ to 2¢ at Chicago. Repeated showers delayed combining over wide areas of Kansas while harvesting in Texas and Oklahoma was in the final stages. Tests of early arrivals indicate below average protein content. Spring wheat was slightly lower on ordinary protein but high proteins gained up to 2¢ with increased interest. Durum advanced 3¢ with a moderate demand for light offerings. White wheat dropped 6¢ in the Pacific Northwest in a shift to new-crop basis. Trading was mainly for spot or nearby shipment. Rye held steady in light trading with little change in crop prospects.

Corn declined 1¢ to 2¢ per bushel at most points but held steady at Chicago where local interest was active. The new crop generally made good progress. Oats gained a penny reflecting light offerings. Barley held firm at Minneapolis with offerings limited but declined 6¢ to 8¢ at Portland in a shift to new-crop basis. Grain sorghum was firm with supplies tight. Offerings from southern Texas were well absorbed.

Soybeans gained 2¢ to 6¢ per bushel reflecting in part the advance in oil. Offerings of soybeans continued light with farmers continuing to hold beans under loan. Flaxseed held steady in light trading at Minneapolis.

---

<sup>1/</sup> Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Non-transit from the East.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**  
(All data in 1,000 bushels except grain sorghum in 1,000 cwt.)

# Soybean prices compared with market value of soybean oil and meal

	Unit of value	June 1969	May 1969	April 1969	June 1968
Soybean Oil:					
Average price at crushing plant ...	Cents per lb.	7.8	8.6	8.7	7.9
Value from bushel of soybeans <u>1</u> / ..	Dollars	.83	.91	.92	.84
Soybean Meal 44%					
Bulk price at Decatur .....	Dollars per ton	79.25	76.30	73.60	79.50
Value from bushel of soybeans <u>1</u> / ..	Dollars	1.85	1.82	1.75	1.90
Value of oil and meal from bushel of soybeans <u>1</u> / .....	Dollars	2.68	2.73	2.67	2.74
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.61	2.64	2.60	2.63
Spread between soybean price and value of oil and meal .....	Cents	7	9	7	11

1/ Based on assumption that a bushel of soybeans will yield 10.6 pounds of oil and 47.8 pounds of meal -- the same as the 1967-68 outturn.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil, or soybean meal.

WEEKLY  
SUMMARY  
AND  
STATISTICS

Volume 17 No. 28

Independence, Missouri 64050

July 11, 1969

## GRAIN PRICES HIGHER

Cash grain prices generally strengthened during the week ended July 10, with somewhat more active trading. July estimates indicate smaller 1969 crops of corn, wheat and barley with increases for rye and flaxseed.

Hard winter wheat prices advanced 1-3¢ per bushel reflecting improved export and domestic demand and somewhat lighter receipts. Most of the gain was in high protein wheat reflecting the lower protein tests for the new crop. Soft red winter gained 3-5¢ at Chicago and St. Louis. Spring wheat went up 3-6¢ with the sharpest gain for 15 percent protein and above. Demand was aggressive from both local mills and exporters. Durum went up 7¢ at the lower end of the range reflecting increased export interest. White wheat held steady in the Pacific Northwest as demand was good for nearby delivery and wheat harvest was slow. Rye held at last week's level. A crop of 31 million bushels was indicated by crop prospects on July 1, a gain of 8 million over 1968.

Corn went up 1-3¢ per bushel reflecting in part somewhat spotty growing conditions. The 1969 crop was placed at 4,286 million bushels by the crop reporting board against last year's output of 4,375 million. Oats were unchanged to a penny higher with limited trading. A crop about equal to last year was indicated July 1. Barley held unchanged in limited trading at Minneapolis but dropped 4-5¢ at Portland to a new crop basis. Grain sorghum market was firm with available offerings from the new crop short and export demand good.

Soybeans were about unchanged during the week with limited interest from processors. Export trade was also light. Flaxseed closed 3¢ lower at Minneapolis. A crop of 30.5 million bushels was indicated by July 1, conditions as against the 1968 output of 27.3 million bushels.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**  
(All data in 1,000 bushels except grain sorghum in 1,000 cwt.)

Volume 17 No. 29

Independence, Missouri 64050

WEEKLY  
SUMMARY  
AND  
STATISTICS

July 18, 1969

## GRAIN PRICES MOSTLY LOWER

Spot grain prices were easier at most of the Nation's markets the week ended July 17. Weakening factors were the large stocks of most grains, slow export trade and bright prospects for new crop production.

Hard winter wheat prices were unchanged to down 6¢ with weakness attributed to a moderate increase in spot supplies. Widest loss was in the 12 percent protein bracket at Kansas City. Spring wheat advanced 1-2¢ at Minneapolis. Basis for strength was the rather broad demand from mills and exporters and news that the protein content of the winter wheat is on the low side. Durum wheat bids were sharply lower, however, as buyers noted the rather large carryover and good reports on new crop. White wheat sold at about a steady level with much of it under reseal loan. Fresh export business was light but so was movement from primary holders. Rye was steady. Shipping was active but most of it was for CCC and went to storage. The crop is a bit behind last year and not quite ready for harvest.

Corn markets were mostly unchanged to down 2¢ reflecting a steady flow to market and increased offerings at some points. White corn at Kansas City dropped sharply as users had covered urgent needs. Lower prices were reported for oats. Processors were out of the market at some points and buying interest did not appear until prices had dropped 1-2¢. Barley prices were somewhat mixed moving up to 1-2¢ at Portland and 2-4¢ at Kansas City where offerings were small and strong sorghum prices made barley attractive to more buyers. Healthy gains were shown in the grain sorghum markets where exporters covered commitments and found offerings limited.

Soybean prices were mostly firm to up 1¢. Products firmed up a bit to give the market support. Enough beans remain under loan and reseal to keep a free supply on the short side, but both the crush and the exports of beans are expected to be records this crop year. Flaxseed prices dropped rather sharply finishing down 7¢ per bushel. Crushing is on a limited scale and buyers adjusted their prices toward a new crop basis.

## Special Features

	<u>Page</u>
Wheat - Inspections for export by programs, classes, and country of destination, July 1968-June 1969 .....	6
Wheat - Inspections for export by classes, programs, coastal areas, and country of destination, July 1968-June 1969 .....	7-10
Grains - Inspections for export by coastal areas and country of destination, July 1968-June 1969 .....	10-12

<sup>1/</sup> Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Non-transit from the East.

## CASH GRAIN PRICES FALL

Cash grain markets were under pressure during the week ended July 24 and most prices were lower at the close. Good growing weather and harvest expansion were factors.

Winter wheat at Southwest markets was mostly 2¢ lower when buyers found ample offerings to meet their needs. New lows were established in option trade and weakness in the cash was most evident in the 12 percent protein bracket at Kansas City with premiums down 4¢ for those kinds. Spring wheat was down sharply, particularly the high protein which finished down 9-13¢. Liberal receipts during the past couple of weeks filled some of the urgent needs and buyers limited orders to cover only nearby needs in view of the good crop conditions. Durum showed a bit of weakness mostly at the low end of the ranges closing down 2¢ from last week. White wheat at Pacific Northwest markets held steady for nearby delivery, but buyers had lower-price ideas for delivery next month when it is expected that harvest will be in full swing. Bids for August shipment were 1-2¢ under the nearby price. Rye was weaker under the influence of lower wheat and the nearby harvest in the Dakotas where more than 40 percent of the U. S. crop is grown. Cash prices dropped 6¢.

Corn was steady at Chicago and Kansas City but was 1-3¢ lower at other terminals. Corn stocks have increased at Chicago, and warm humid weather has been favorable for new crop growth. Lower oat prices followed reports that the crop is ripening in the Western corn belt and the expectation that selling in the period just ahead will expand. Oats sold 1¢ lower at most markets. Barley prices fell as much as 5¢ at Minneapolis but were 1-2¢ higher at Kansas City. Losses at Minneapolis were limited only to the feed types. Heavy receipts and the nearby harvest in the upper Midwest prompted the decline. Grain sorghum prices advanced 2-3¢ per cwt. at Southwest markets where strong export demand and heavy domestic feed use coupled to strengthen prices.

Soybean prices were mixed finishing 1¢ higher at Chicago but sold 2¢ lower at Minneapolis. The crop was reported to have responded well to the recent warm weather, and buyers limited purchases to nearby needs in view of the lower support price for 1969 crop soybeans. Flaxseed prices slipped further and finished down 3¢. Crushing operations are limited and the support level is 15¢ per bushel lower for the 1969 crop which will encourage processors to use old supplies before new crop is available.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Grains: Export prices basis prompt or 30-day shipment, July 24, 1969  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat			Corn	Soybeans	Barley
	Class	Price	Certificate cost 1/	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
-- Dollars --						
Duluth ...	No. 1 Hvy. Northern Spring, 14% prot. ...	1.72	.03	-	-	-
Baltimore	No. 2 S. Red Winter ...	1.30	.19	1.38	-	1.13
Gulf .....	No. 1 Hard Winter: Ord. protein ..... 14% protein .....	1.39 1.67	.17 .05	1.37 -	2.76 -	2.18 -
Pacific Northwest:	No. 2 Western White ...	1.44	.13	-	-	1.02

1/ The cost of the export certificate or the export payment rate is not included in the export price of wheat.

2/ No. 3 barley at Baltimore and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

NOTE: The export price of Ordinary Hard Red Winter wheat was lowered by 12 cents per bushel at Gulf and East Coast ports effective July 18. Similar adjustments were made in the higher protein Hard Red Winter wheats and a supporting reduction was made in Soft Red Winter wheat prices. Existing export prices of Hard Red Winter wheat for South America are maintained.

Adjustments in the Lakehead, East and Gulf Coast export prices of new crop Hard Spring wheat (Sept. 16 and beyond) were also made to maintain competitive price relationships. No basic changes are made in the West Coast wheat export prices.

WEEKLY  
SUMMARY  
AND  
STATISTICS

Volume 17 No. 31

Independence, Missouri 64050

August 1, 1969

## GRAIN PRICES MOVED LOWER

Cash grain prices at the Nation's market moved downward with most of the news having a bearish tone during the week ended July 31. Generous stocks and favorable crop news tended to depress the market as harvest of small grains moved into Northern states.

Winter wheat markets were mostly down a penny or two but premiums for ordinary protein advanced 1¢ at Kansas City and 12 percent protein premiums were up 5¢. Slack export business and keen competition from other export nations limited demand from exporters. Spring wheat was mostly down 2¢ at Minneapolis. Premiums for the extremely high proteins were up a couple of cents but very little of these were coming to market. Mills supported the market well but limited orders to cover only short-term needs. Durum prices were down a bit at the bottom end of the range early in the period but recovered near the close and finished unchanged. Cash white wheat finished down 3¢ at West Coast markets. Rye fell quite sharply and finished down 6¢ at Minneapolis. While stocks were smaller on July 1, than a year ago, the crop is expected to be up sharply from last year.

Corn markets were generally lower with most markets reporting 1-3¢ losses. Stocks of corn on July 1, pointed to smaller domestic disappearance than many in the trade had expected and this sparked heavy liquidation and a rather sharp decline in the option market. Oat markets, too, showed a weaker tone with the harvest spread generally in the Western corn belt states. At Minneapolis prices were steady but Kansas City and Chicago showed declines of 1-2¢. Barley prices firmed up a bit at some points but at Minneapolis, barley was moving to market in heavy volume and buyers were quite selective. Prices at Minneapolis fell from 2-10¢ per bushel. Grain sorghum prices fell from 7-12¢ per cwt. Exporters were less active as no new business was booked and bids from feeders were lower.

Soybeans were down 2¢ to 3¢ at major markets. Cash meal was weak, reflecting a slow feed demand and a large June crush. Although exports and domestic crushings have accounted for about 45 million bushels more beans this year than last, stocks on July 1, were 57 percent above a year ago. Flaxseed held unchanged.

<sup>1/</sup> Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Non-transit from the East.

Volume 17 No. 32

Independence, Missouri 64050

WEEKLY  
SUMMARY  
AND  
STATISTICS

August 8, 1969

CORN UP -- WHEAT STEADY TO LOWER

Corn markets moved up 1-3¢ reflecting export activity but wheat prices held unchanged to down 6¢ during the week ended August 7. The balance of the list was mostly lower under the impact of large market movement and limited overseas demand.

Winter wheat finished unchanged to down 6¢. Mill demand was fair reflecting expanded sales of flour last week but the export picture remains bearish and buyers were looking for specific proteins. Premiums for 12 percent protein were down 2-4¢ while 13 percent premiums were off 4-6¢. Spring wheat demand held up well. Protein premiums were mostly steady but a slightly easier tone appeared in the medium protein categories at diversion points. Most spring wheat sales were at fractionally lower levels. durum prices improved 4¢ at the bottom of the ranges with some interest from exporters. Mills looked for the better qualities. White wheat bids were mostly unchanged for August shipment to-arrive Coast. Premiums were being paid for immediate delivery to cover previous contracts but trading was slowed by world wheat problems. Near-peak movement of new crop rye put the "spot" price down another 2¢ at Minneapolis. Enough demand appeared at Duluth, however, to advance the price there 2¢.

Corn markets improved. Processor demand was reported good at some points, and export activity was credited with firming up bids near the close. No. 2 yellow corn was up 3¢ at Chicago. The market for oats was unchanged at all terminals. Harvest is in the windup stage in Iowa and Illinois and is getting underway in the Northern producing sections. Barley prices fell further at most points. Prices were adjusted to new crop basis at Minneapolis in what was described as a narrow market. Grain sorghum prices were easier at Kansas City but strengthened at Fort Worth largely on the basis of export demand.

Soybean prices moved in a narrow range and finished up 1¢ at Chicago while the Minneapolis bids were 1¢ lower. Cash meal has been somewhat on the easy side, and reports indicate that crushing will be curtailed some between now and new crop for the purpose of repair and maintenance of plants. New export business has been rather dull but inspections during the week ended August 1, were more than double those of the week before. Flaxseed prices eased and bids at Minneapolis were 2¢ lower. Crushing is light and movement to market was heavy with most of the arrivals for CCC.

---

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Replaces quotations formerly reported for Ft. Worth.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**

Based on weekly reports of inspections for export.

1/ The quantity of grain exported from Canadian Ports was deducted from Lake shipments to Canada.

Wheat, Flour and Wheat Products, United States exports by month, 1966-69  
(All data in 1,000 bushels)

[illegible]

NOTE: Totals do not include 393,000 bushels in 1966-67 and 636,000 bushels in wheat equivalent of rolled wheat shipped for relief under Title II for Relief not available on a monthly basis. Rolled wheat shipment data for 1968-69 not available.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	July 1969	June 1969	May 1969	July 1968
Soybean Oil:					
Average price at crushing plant ...	Cents per lb.	8.1	7.8	8.6	7.4
Value from bushel of soybeans <u>1</u> / ..	Dollars	.86	.83	.91	.79
Soybean Meal 44%					
Bulk price at Decatur .....	Dollars per ton	77.05	79.25	76.30	82.80
Value from bushel of soybeans <u>1</u> / ..	Dollars	1.84	1.85	1.82	1.97
Value of oil and meal from bushel of soybeans <u>1</u> / .....	Dollars	2.70	2.68	2.73	2.76
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.64	2.61	2.64	2.64
Spread between soybean price and value of oil and meal .....	Cents	6	7	9	12

1/ Based on assumption that a bushel of soybeans will yield 10.6 pounds of oil and 47.8 pounds of meal -- the same as the 1967-68 outturn.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil, or soybean meal.

## CASH GRAIN PRICES MIXED

Cash grain markets followed an irregular price pattern during the week ended August 14. The unsettled pricing of wheat in world trade and the stronger competitive situation in the export market kept wheat prices on the defensive. Japan bought some wheat during the period and winter wheat was firmer at the close. Feed grains were mostly steady to higher.

Winter wheat markets turned stronger near the close of the period. Offerings were light and some export business was reported along with export flour sales. At Kansas City prices improved 2-4¢ per bushel. Spring wheat was offered rather freely and prices were down sharply. Weakness was especially noted in the 14 percent and higher proteins where spot premiums were down 4-12¢ per bushel. Demand was fairly active at the lower level. Durum prices dropped 8-12¢ when buyers noted the large crop estimate and quality of the new crop offerings is reported good. White wheat at Pacific Northwest markets sold mostly 1¢ lower but recovered some from lows established earlier in the week. Japan's purchase of a couple of cargoes of white wheat steadied prices at the close. Rye declined another penny, reflecting continued heavy movement and a weaker tone in the spring wheat.

Corn was unchanged to up 2¢ at main markets. Offerings were fairly large but demand was good. Oat prices were up a penny or two in Kansas City and Chicago but most other markets were steady. Fairly heavy movement of oats was reported with the quality in the Midwest markets reported fairly good. Barley bids were lower at most points with the market in the upper Midwest flooded with receipts. Buyers offered 4-6¢ less per bushel than last week and a generous carryover of unsold cars was reported at the end of most sessions. Grain sorghum prices improved with the firmness in corn and some buying for export.

The market for soybeans firmed up and some export business in oil tended to firm that market in the option trade. Processor demand for the light soybean receipts tended to advance the bids at most terminals. Flaxseed prices fell another 2¢. Weakness stemmed from light crushing operations and the nearness of the new crop movement.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Replaces quotations formerly reported for Ft. Worth.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**

## WHEAT SELLS HIGHER

Grains continued to follow an irregular price trend during the week ended August 21. Wheat prices were generally 2-4¢ higher but hard winter closed 6-7¢ higher at Portland. Corn and oats were steady to lower at most points.

Hard Winter wheat finished up 1-2¢ at Kansas City with improved mill and export demand furnishing the strength. At Chicago No. 2 soft red was down 1¢. Demand for spring wheat improved particularly for the low and medium proteins. High proteins were offered more freely and premiums were down 3-6¢ for 15 percent or higher. Generous offerings of durum and the potential supply weighed against values. Ranges were narrowed with the top end down 5¢ while the bottom was up 2¢. White wheat sold at about steady prices as exporters hoped to share in overseas trade with Korea next week. Rye prices improved as the peak movement is over and fair flour sales spurred buying.

Corn prices were up 2¢ at Chicago but were steady to down 1¢ at other points. Rail arrivals at Chicago were limited and active processor demand there advanced prices. Oats traded in a narrow range with ample offerings at most points taken at steady to slightly lower prices. Barley was unchanged at most points but the market turned about at Minneapolis and malting barley firmed up as much as 8¢ in the ranges for some of the intermediate malting kinds. Grain sorghum prices advanced 1¢ at Kansas City but lost 2¢ at Fort Worth. Short covering of export sales and producer holding were dominant features in the trade.

Soybean prices eased at most terminals with good crop prospects, and the nearness of the new crop weighed against values. Selling was light but buyers were not taking on more than short-term supplies. Flaxseed dropped another 2¢ as the new crop made good progress toward maturity. A larger crop and a carryover prompted caution on the part of buyers.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Replaces quotations formerly reported for Fort Worth.

# **GRAIN: Commodity Credit Corporation estimated non-committed inventory**

(All data in 1,000 bushels except grain sorghum in 1,000 cwt.)

## WHEAT MARKETS HIGHER

Cash grain markets across the nation were mixed for the trading period ended August 28. Wheat prices were generally 2-3¢ per bushel higher, while most feed grains turned downward. Export movements were active for most grains.

Hard winter wheat was 2-3¢ per bushel higher with the larger increase for ordinary proteins in an area of good export demand. Soft red winter wheat at Chicago followed the futures advance. Offerings of spring wheat found good call and advanced 2¢ per bushel. Premiums for higher proteins advanced a couple of cents with good blender demand. Durum was the lone loser in the wheat complex and closed the trading period 2¢ lower. Offerings were more liberal as harvest progressed throughout the northern tier. White wheat held steady on the West Coast. Movements from the farms were on the light side, however, business activity lacked vigor to strengthen prices. The rye market was slightly easier and closed a penny lower.

Corn prices ranged from 2-8¢ per bushel lower. The weakening pressures of nearness of harvest were in part offset by light receipts and good movement into export channels. Processor demand at major milling centers was light. White corn continued the sharp decline and closed 10-15¢ per bushel lower at Kansas City. Oats generally followed the corn lower and closed mostly 1-2¢ lower, however, select quality offerings were scarce and instances a cent over last week. Barley quotations were mixed with prices ranging from 4¢ per bushel lower to 8¢ higher. Supplies in the upper midwest were somewhat lighter as the harvest was in the windup stages. On the West Coast, export business was lacking and prices declined 3-4¢. Grain sorghum prices were pushed upward at Kansas City and on the West Coast but slightly weaker in the Fort Worth area. Export business was the strengthening factor, while advances in harvest depressed the Texas markets.

Soybean marketing activities were on the dull side. Quotations were unchanged to 7¢ per bushel lower. Very little immediate business was handled and with most processors bidding into the new-crop. The flaxseed market leveled out.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Aug. : 1969 2/	July : 1969	June : 1969	Aug. : 1968
Soybean Oil:					
Average price at crushing plant ...	Cents per lb.	8.9	8.1	7.8	7.5
Value from bushel of soybeans 1/ ..	Dollars	.94	.86	.83	.80
Soybean Meal 44%					
Bulk price at Decatur .....	Dollars per ton	76.68	77.05	79.25	84.40
Value from bushel of soybeans 1/ ..	Dollars	1.83	1.84	1.85	2.02
Value of oil and meal from bushel of soybeans 1/.....	Dollars	2.77	2.70	2.68	2.82
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.60	2.64	2.61	2.62
Spread between soybean price and value of oil and meal .....	Cents	17	6	7	20

1/ Based on assumption that a bushel of soybeans will yield 10.6 pounds of oil and 47.8 pounds of meal -- the same as the 1967-68 outturn. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil, or soybean meal.

Grains: Export prices basis prompt or 30-day shipment, August 28, 1969  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat	Corn	Soybeans	Barley

Independence, Missouri 64050

September 5, 1969

## CORN DOWN -- WHEAT MOSTLY HIGHER

Yellow corn sold from 2-5¢ lower at the Nation's markets but wheat sold steady to up 3¢ reflecting orderly marketing and fair flour export sales during the week closing September 4.

Winter wheat at Southwest markets held steady with good flour sales and some additional export business late in the period. Demand for spring wheat was quite broad coming from both the West Coast and the Southwest where protein was needed for blending. This put prices up more than 1¢ in all the protein categories. Durum wheat moved to market in an orderly fashion. A broad demand resulted in prices working 3¢ higher. White wheat at Pacific markets held steady with slow farm selling. Export business was good with Japan and Korea buyers of about 7 cargoes of white wheat this week. Rye prices remained steady. Receipts dropped sharply but demand was limited to some extent by lack of space.

Yellow corn was down 2-5¢ at main markets while white corn declined 25-30¢ per bushel at Kansas City. Weakness in corn stemmed from the nearness of the new harvest in Southern sections of the belt, and buyers covered only short-term requirements. Markets for oats were mixed showing a 2¢ loss at Kansas City and advancing 1-2¢ at Minneapolis. Lower prices at some points reflected heavy receipts which depressed prices. Barley markets were mostly firm to higher. Feeding interests took fairly generous receipts at some points. Malting barley at Minneapolis sold mostly 2¢ higher within the range, particularly the bright plump kinds. Thinner types were slow to move. Grain sorghum prices were mixed with Kansas City reporting a decline of 8¢ under pressure of harvest while Fort Worth buyers paid 2¢ higher than a week ago when supplies were not sufficient for heavy feed usage and spotty export activity.

Soybeans generally traded in a narrow price range and finished mostly steady. Commodity Credit Corporation reported sales of more than 10 million bushels during the week from its stocks, and buyers were covering only their needs until new-crop becomes available. Free stocks were reported tight. Flaxseed prices dipped 6¢ under harvest pressure and sharply increased offerings.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Replaces quotations formerly reported for Fort Worth.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**

September 12, 1969

## WHEAT MARKETS ADVANCE

Wheat prices were generally higher during the week closing September 11, but corn markets fell 1-4¢ while the other grains moved in a narrow price range.

Winter wheat advanced 2-4¢ per bushel when buyers looked for more wheat than was offered with the best demand for the ordinary proteins. Spring wheat was wanted and prices were improved when short covering was reported during late sessions. High proteins went up 10-14¢ per bushel but others were up only 1-3¢ during the period. Durum wheat prices fell 3¢ at the top end of all the grade ranges but finished unchanged at the bottom ends. Demand was fairly strong but receipts were large and much good quality wheat was being offered. At Portland white wheat bidding was higher as selling from first hands was slow. Farmers' resistance to low prices helped edge the wheat upward. Rye prices improved 1¢ at Minneapolis where receipts continue to decline following the recent harvest.

While export activity in corn has been good and feeding remains at a high level, prices at most points were down 1-4¢ as buyers adjusted their bids toward a new crop basis. Smaller offerings of oats following the harvest period tended to strengthen the market, and most quotations showed oats up 1¢. Most terminals reported barley unchanged to up a penny but at Minneapolis malting barley was unchanged to down 4-6¢ when receipts were more generous and limited space prompted buyers to become more selective. Texas markets for grain sorghum remain strong advancing 4¢ per cwt. as demand from feeders and mixers exceeded the available supply and rains interrupted the harvest. Kansas City prices held steady.

Bids for soybeans were on a flat price at most Midwest markets and finished unchanged to down 1¢. Buyers limited purchases due to the close-by harvest. Soybean meal buyers confined purchases of meal to nearby needs since October meal was available at \$4.00-5.00 per ton below the September asking price. Flaxseed movement was large reflecting excellent harvest conditions.

Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth.  
Simple average of daily closing prices.

Non-transit from the East.

Replaces quotations formerly reported for Fort Worth.

New-crop.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory**

STATISTICS

Volume 17 No. 38

Independence, Missouri 64050

September 19, 1969

WHEAT UP -- SOYBEANS LOWER

Higher prices for wheat were reported with spring wheat the leader on the up side while soybean bids were lower as buyers shifted to a new-crop basis. Other grains moved in a narrow price range the week ended September 18.

Gains of 1¢ were reported for winter wheat at Southwest markets where trading was at low levels throughout the week and demand was quite strong. Broad demand put spring wheat up sharply. Buyers took the fairly large offerings and looked for more. By the end of the period, springs were selling from 4-9¢ higher with the strong proteins at the highest premium. Durum buyers too were more aggressive and while the top qualities were down 1-2¢, the lower grades moved 4-10¢ higher as buyers attempted to cover commitments. Cash white wheat held firm at Pacific Northwest markets. Good export activity promoted buying and strong producer holding was evident. Receipts of rye dropped sharply as producers held supplies in the country.

Corn was mostly steady as high feeding levels and strength in competing feed grains gave the market support, but pressure from the nearby harvest lowered values at some points. Tightness was reported in the market for oats, and prices were firm to up a penny at most markets. Only minor changes were reported in the barley markets, where selling from first hands was slow and prices held firm to up a penny while at other points demand was narrow and prices were easier. Grain sorghum prices were mixed. At Kansas City a gain of 5¢ per cwt. reflected light offerings as rains delayed the harvest. Other markets were about steady as supply and demand were about in balance.

Soybean prices dropped further this week in a transition to a new-crop basis. Bids were down from 4-8¢ per bushel, and those bids called for quick delivery. Scattered rains delayed the harvest but gathering of the crop has started at some early maturing points. Receipts of flaxseed declined following the harvest, and this prompted higher bids. Closing levels were at 5¢ above a week ago.

---

## Special Features

	Page
Canadian Grains - Yield and production .....	2
Grains - Inspected shipments by rail and barge at selected points, July 1969 .....	7
Grains - CCC Dispositions .....	8
Grains - CCC-owned stocks by states, August 31, 1969 .....	9
Wheat - Quantity of 1969 and 1968 crops put under price support by states ...	10
1968 Crop corn and grain sorghum - Quantity put under loan, repaid, delivered, resealed and outstanding as of August 31, 1969 .....	11-12
Oats and barley - 1969 Crop put under loan, loans outstanding 1968, reseal outstanding 1968 .....	13-14
Grains - Price support activities as of August 31, 1969 and 1968 .....	15

CANADIAN GRAINS: YIELD AND PRODUCTION

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ New-Crop.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory (1,000 bushels)**

COMMODITY	COMMERCIAL STORAGE		BIN SITES	ALL OTHER POSITIONS	WEEK ENDED Sept. 12, 1969		
	COUNTRY	TERMINAL			TOTAL INVENTORY	COMMITMENTS * OUTSTANDING	UNCOMMITTED ** BALANCE

## GRAINS SELL LOWER

Most grain items declined in value during the week ended September 25. Soybean prices were down sharply as they were adjusted to more nearly reflect a new crop basis. The nearness of the new crop corn harvest tempered demand for corn.

Winter wheat went down about 2¢ as general market inactivity weighed against values. Export activity was not broad enough to give the market much support. Buyers of spring wheat were not very active this week. This was particularly true of the high proteins where premiums were off about 4¢. Offerings were moderate. Best grades of durum sold about steady but buyers were looking for the lower grades which were in extremely short supply. Those were up 3-5¢, and the discount for ordinary durum was about 2¢ less than last week at the close. White wheat prices firmed at Pacific Northwest markets and gained 1¢ in face of little export business in that area. Rye prices gained 1¢ at Minneapolis where receipts continued on the light side.

The principal weakening factor in corn was the nearby harvest. A few cars of new crop corn were inspected in Chicago but were applied against earlier contracts. There was a fair movement by truck and prices for yellow corn were down 1-3¢ at main markets. The market for oats improved as limited spot offerings were purchased at some Midwest points to replace millfeeds in rations. Barley prices were reported steady at most markets with a little stronger tone indicated for malting barley. Gains were limited, however, to about 2¢ in the range. Pressure from new crop supplies put grain sorghum lower in main producing sections of the nation, but good demand from feeders and exporters limited declines to a penny or two per cwt.

Processors and other buyers were cautious and adjusted the bid basis for soybeans downward sharply. This reflected the nearness of the new crop, and combining is reported started in scattered areas in Illinois and Indiana. Spot prices were down 8-20¢ per bushel as processors tended to remove premium bids for quick delivery. Flaxseed prices held steady all week.

## WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION  
UNITED STATES DEPARTMENT OF AGRICULTURE

CONSUMER AND MARKETING SERVICE

Volume 17 No. 40

Independence, Missouri 64050

October 3, 1969

### WHEAT UP - OTHER GRAINS MOSTLY LOWER

Cash grain markets were generally unchanged or lower during the week ended October 2. Wheat sold higher at most points, finishing up as much as 3¢ from last week. Producers sold only limited quantities.

A good flour business and increased export demand kept the winter wheat firm as much as 3¢ higher during the period. A good demand was reported for spring wheat at mills and exporters competing for the smaller receipts. Premiums were higher in some of the brackets but this was largely offset by an advance in the October future price. Durum receipts were down rather sharply and this helped keep prices steady. White wheat moved up 1¢ at Pacific Northwest markets and there was a fair amount of producer selling. Export business was erratic. Rye buyers took offerings at unchanged prices all week and movement to market was light.

Feed grain markets were mixed but were mostly lower. White corn was down 1¢ at Kansas City. Yellow corn was mixed and sold 3-4¢ lower at Chicago but was 4¢ at St. Louis. Other markets reported corn in a narrow range. The market for oats was unchanged to down 1¢. Mills were on the sidelines at some points and the market was supported largely by elevator demand. Barley markets moved in a narrow range at the nation's terminals with most reporting stations showing feed grade barley about unchanged. Malting barley sold unchanged to down 2¢ per bushel with demand described as slow and narrow. Grain sorghum prices were down rather sharply reflecting expanded harvest movement that satisfied most export positions.

Further downward adjustments were made at soybean markets to more nearly reflect new crop conditions. Most of the beans moving to market were for CCC account, but harvest was expanding into the western part of the belt, and traders looked for a larger movement in the weeks ahead. Flaxseed went up 3¢ reflecting heavy country selling as the harvest nears completion.

WEEKLY  
SUMMARY  
AND  
STATISTICS

October 10, 1969

## GRAIN PRICES ADVANCE

Higher prices were reported for cash grains at the Nation's markets during the week ended October 9. Oilseeds gained 3-5¢, feed grains finished generally up 2-4¢, while wheat markets closed firm to 1¢ higher.

Winter wheat finished mostly up a penny reflecting steady premiums and a small gain in the option trade. Demand was helped by good domestic flour business and moderate export sales. Country offerings expanded a bit at the higher level. Spring wheat demand was good but protein premiums showed a bit of weakness particularly in the high brackets. Durum was not moving in volume and buyers raised bids 2¢ at the top and 4¢ at the bottom of all grade ranges. White wheat held firm at Pacific Northwest markets. Grower resistance was noted but light movement to market about satisfied the trade needs as export sales were limited on the West Coast. Skimpy rye offerings at Minneapolis prompted buyers to advance bids 2¢ from last week.

Most markets reported yellow corn up 2-4¢ this week in face of expanded harvest operations. A combination of good export demand, a high level of feeding, and limited offerings provided the market support. Oats at Chicago broke sharply when terminals were occupied with corn and soybeans and put the basis down 6¢. Other important markets reported small gains for oats. Barley moved in small volume and prices for some of the intermediate grades advanced 2-4¢ per bushel. Feed barley was about steady. Feed lots provided good outlets for grain sorghum, and this along with some export demand at Gulf Ports put prices up about 4¢ per cwt. at Southwest markets.

Soybean prices improved. Commodity Credit Corporation owned beans were moving in volume but offerings of newly harvested crop were limited. Flaxseed moved up 4¢ reflecting smaller offerings as the harvest is nearing completion in the upper Midwest.

EXPORTS OF CORN AND GRAIN SORGHUM LOWER ... exports of corn and grain sorghum, based on inspection reports under the Grain Standards Act, were sharply lower during the 1968-1969 crop year. Exports of corn totaled 499 million bushels, a decline of 108 million bushels and grain sorghum totaled 108 million, a decline of 50 million bushels. Movements of corn from the Gulf declined about 70 million bushels, with minor declines at all other areas except Canadian ports. Shipments of corn to the Netherlands, last years largest taker, declined 50 million bushels. A decline of 20 million bushels of grain sorghum to Japan was offset by a slight increase in corn with total feed movement about unchanged. (Details on page 13)

October 17, 1969

## GRAIN PRICES UP

Cash grain markets were higher on a broad front during the week ended October 16. Weather became an important market factor as rains and cold weather delayed the corn and soybean harvest. Tight farm holding, heavy use of the price support loan program, and export news were supporting factors in wheat.

Winter wheat prices advanced 4-6¢ at one point but these prices did not hold. Exporters were seeking the ordinary proteins while milling interest was evident for the high protein levels. Closing prices were 2-3¢ better than last week. The premium basis for spring wheat weakened but the December option advanced enough to keep "spot" prices fairly steady except for the high protein brackets which sold about 2¢ lower in cash trade. Durum was up early in the week reflecting broad interest but space was lacking and by the close export interest was nil. White wheat firmed up a bit. Buying was encouraged by export agreements with India and Pakistan. Rye held firm. Extremely light offerings tended to hold the market steady but the shortage of space narrowed the demand.

Buyers who tried to cover corn commitments found only limited offerings and the market advanced mostly 2-5¢. Cold wet weather, along with some snow in certain areas, slowed picking operations. The market for oats advanced 3¢ at Minneapolis where receipts were small but other markets reported steady to slightly lower prices. Traders said oats was attractively priced when compared to other feed grains. Barley prices were steady at most terminals. Certain varieties of malting barley were marked 2¢ higher at Minneapolis. Grain sorghum markets strengthened at Southwest points where export and feeder demand was not being satisfied by the slow movement from the country.

Traders said the soybean market was strictly a weather affair. Good demand was reported from exporters who had commitments to fill and from crushers who had limited stocks of soybeans. Strength in the meal market came from good export and domestic demand which kept supplies on the short side. The flaxseed market held steady. Receipts at Minneapolis and Duluth were down rather sharply.

---

## CORN WEAKER -- OTHER GRAINS MIXED

Corn sold lower at the Nation's markets during the week ending October 23 as clear cold weather allowed producers to resume harvesting the crop. Mixed prices in the balance of the list reflected a shortage of storage space, transportation problems and limited producer selling.

Hard winter wheat at Southwest markets advanced 2-3¢. Premiums for the higher proteins were steady and these were taken by mills. The basis for ordinary proteins advanced 1¢, supported largely by export buyers. Spring wheat values were about a penny lower and durum prices fell 4-5¢. Lack of storage space at Midwest terminals narrowed demand, but mills continued to support the market. White wheat at West Coast markets finished higher. Little is moving to market and, although export sales were light, buyers were forced to pay slightly higher prices to fill their needs. Rye was unchanged all week. Space was short at Midwest terminals. Supplies are large and export outlook rather discouraging.

Corn prices dropped rather substantially, finishing down as much as 8¢ per bushel at Chicago. Producers were able to continue harvesting following some rain. The market for oats was mixed. Movement was not heavy and quality of the offerings at some points failed to measure up to needs of the millers. Barley markets were steady to up 3-4¢. Top kinds of malting barley at Minneapolis sold mostly at steady prices but the low end of the range was marked up 5¢ by the close of the period. Grain sorghum prices firmed up with feeders and feed mixers giving the market fair support.

Soybeans advanced 1-2¢ per bushel despite improved harvest weather. The expanded harvest created some transportation problems with both rail and barge facilities taxed by heavy movement. Exports of soybeans hit a record of 16.4 million bushels last week with inspections this season to date 10 million bushels above a year ago. Crushing of soybeans in September at 48.3 million were 10 million more than in September 1968. Flaxseed declined 2¢ per bushel in light trading.

## CASH GRAIN MARKETS MIXED

Prices were mixed in "spot" grain markets during the week ended October 30. Corn and soybeans sold lower as the market responded to the expanding harvest and more available supply. Winter wheat markets were generally down a penny but spring wheat gained 2¢ in light trading. Rye and barley finished up a penny or two reflecting light arrivals.

Disappointing export sales narrowed demand for winter wheat at Southwest markets, but losses were limited to 1¢ per bushel. Spring wheat was moving to market in small volume and while export demand was reported slack, mills took the daily offerings with no change in the premiums, and "spot" prices reflected the nearly 2-cent advance in the Minneapolis December price. Durum receipts dropped sharply. The mills were the main buyers. Top ends of the better grades were marked up 2¢. Steady to slightly lower prices for white wheat at West Coast markets reflected a letdown following a Pakistan tender and fairly steady producer selling. Rye offerings were nearly nonexistent, but in face of this, prices were 1¢ higher.

Corn finished unchanged to down a cent or two at main terminals. Hedging pressure was felt in the market as harvest expanded but good export demand limited declines. White corn went up 7-9¢ at Kansas City where supplies were short. Markets for oats showed little change. Heavy good quality oats was wanted at Chicago, and quotations were 1¢ higher. Gains of 1-3¢ were common for barley at main markets. Better kinds of malting barley sold steady at Minneapolis. Grain sorghum markets were generally easier reflecting harvest pressure. A shortage of rail cars and slow harvesting due to rains, however, combined to firm prices at some points at the close.

Soybean prices finished about 2¢ lower at principal markets. Generally weather was favorable for harvest and reports indicate that producers were willing to sell quite freely. A shortage of rail cars hampered movement and a nearly-filled storage situation prompted some caution. Flaxseed prices held steady.

## CORN MARKETS DECLINE - OTHER GRAINS MIXED

Corn prices fell under harvest pressure during the week ended November 6. Soybeans sold firm to slightly higher as that market drew support from record export shipments and a strong demand for oil. The balance of the list moved in a narrow price range and finished mixed.

Winter wheat was mostly 1-2¢ lower in light trading at Southwest markets where buying was limited by disappointing export volume. At Chicago prices closed 2-4¢ higher, however, as some buyers sought supplies to cover previous contracts. Spring wheat finished 1-2¢ higher in face of an easier tone in the basis for 15 and 17 percent proteins. Demand was good and the "spot" market largely reflected the 1½¢ advance in the Minneapolis December price. Durum receipts were light and buyers advanced bids 5¢ at the low end of the grade ranges in an effort to step up movement to market. India was a buyer of white wheat, and this business along with continued reluctance of firsthand holders to sell in any volume tended to keep prices steady at Pacific Northwest markets. Rye traded at steady prices all week. Shortage of terminal space narrowed outlets and with 20 percent more rye in off-farm positions on October 1 than last year, there appeared to be little incentive to own rye.

Corn markets felt pressure from the harvest and were down mostly 1-2¢. Some country elevators were reported filled. Boxcar shortages were widespread and empty barges were at a premium at river points, and this curtailed operations somewhat. Markets for oats were mixed but at most points prices were steady to up a penny in cash trade. Chicago stocks were large and future prices were at or near contract lows during the period. Feed barley sold steady to up a penny at most markets. Malting barley outlets were reported narrow and demand slow. The grain sorghum market suffered rather sharp losses ranging from 2-7¢ per cwt. Harvest pressure and smaller export demand put pressure on this item at Southwest points.

Soybeans finished 1-2¢ higher than a week ago. Record export shipments so far this season and good demand for oil promoted buying of beans but heavy crushing has put pressure on soybean meal and it sold sharply lower than last week. The flaxseed market held unchanged through the past week.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Beginning this issue the Illinois Point price is limited to Central and East Central Illinois. The difference in price will be known when the November average is published.

STATISTICS

Volume 17 No. 46

Independence, Missouri 64050

November 14, 1969

## WHEAT, CORN AND SOYBEANS UP

Cash grain markets were mostly firm to higher during the week ended November 13. Wheat, corn and soybeans benefited from a large movement into export channels and heavy domestic usage. Producers were reluctant sellers.

Winter wheat markets firmed up. Good mill demand and renewed export interest were strengthening factors. Hard winter wheat was up 1-2¢ at Southwest markets while soft winter sold 4-6¢ higher at Chicago and Toledo. A slightly weaker tone developed in spring wheat premiums as the futures market advanced in Minneapolis. Durum buyers were looking for more wheat than was offered and bids were up 3¢ in all grades. White wheat moved up 2¢ at West Coast markets with support from export interest. Rye traded at a steady level all week in face of light arrivals.

Corn markets were strong and finished 1-5¢ higher. Receipts were light at some terminals and good export outlets, heavy processor activity, and a high level of feeding combined to strengthen prices. About 20 million bushels were inspected for export the first week in November. Oat markets were mostly steady but lost 1¢ at some points. Offerings were ample at most markets. Barley finished mostly steady to up 1-2¢ at the Nation's markets. Malting barley was easier at Minneapolis early in the period but the better kinds recovered by the close when receipts continued light. West Coast markets firmed up drawing support from California feed areas. Grain sorghum prices were 2-4¢ lower this week. Lower prices reflected liberal offerings of new and old crop supplies, particularly for export positions. Domestic use was heavy and "spot" supplies are reported short in West Texas.

A broad interest from most segments of the trade pushed soybeans higher this week. Crushing continues heavy encouraged by high oil prices. Export inspections are ahead of a year ago by about 18 million bushels and the bulk of the crop has been harvested in the main belt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Effective November 6 the Illinois Point price is limited to Central and East Central Illinois. The difference in price will be shown when the November average is published.

## GRAIN MARKETS MIXED

Grain prices moved in a fairly narrow range during the week ended November 20. Corn and soybeans closed lower with heavy marketing. Wheat markets were mostly 1-2¢ higher as export sales of both flour and wheat improved the demand.

Small gains were posted for hard winter wheat at Southwest markets. Recent large flour sales to A.S.C.S. and sale of wheat to India tended to firm up prices. Spring wheat finished mostly 1¢ higher. The 17 percent protein was an exception and those traded rather sharply lower this week when premiums dropped 4¢. Mill demand held up and exporters were reported covering nearby needs. The durum market firmed up too, closing mostly 1¢ higher as small receipts were not adequate to meet the demand. Bids for soft white wheat at West Coast points reached crop year highs. India and Pakistan had good balances under conditional letter of reimbursement or purchase authorization, and firsthand selling was disappointing. The rye market was routine and showed no price change all week in face of light marketing.

Heavy export shipments of corn kept prices steady at most markets but harvest pressure was noted at other points and losses of from 1-4¢ were reported where receipts were quite generous. Reduced receipts of oats at Midwest terminals prompted buyers to raise the "spot" basis 1-2¢ at scattered markets, but demand was not aggressive. Barley at West Coast markets improved 2-3¢ reflecting good support from feed areas. Midwest markets reported prices easier early in the period but closed about unchanged from last week. Grain sorghum markets were slower. Export interest was down somewhat and the market was more dependent on the feed areas for outlets.

Soybean buyers were less aggressive. While movement into export channels has been good to date, selling by producers through the harvest period has been quite liberal. Products were mixed with oil showing some weakness while meal turned stronger this week. The flaxseed market fell 3¢. The overall large supply available for the current season prompted buyers to lower bids.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Effective November 6 the Illinois Point price is limited to Central and East Central Illinois. The difference in price will be shown when the November average is published.

STATISTICS

Volume 17 No. 48

Independence, Missouri 64050

November 28, 1969

## GRAIN MARKETS CLOSED MIXED

Wheat was mostly steady to up a penny during the week closing November 26. Feed grains finished mostly lower at the nation's cash markets.

Hard winter wheat was firm to up 1¢, reflecting tight holding by farmers, good flour business and a fair export demand. Spring wheat was a bit easier with the basis unchanged from a week ago. Lack of space and the nearby closing of Lake shipping narrowed demand. Durum buyers had covered their more urgent needs and the market was narrower. Bids for all durum grades were down 3-4¢. Soft white wheat peaked early in the period, but closed at about last week's level. Good export business with India, and anticipation of other business with Pakistan firmed the market. Rye finished up 1¢ at Midwest markets. Buyers were not particularly anxious to accumulate supplies, but lack of offerings pushed prices higher.

Corn markets were mostly unchanged to lower but finished up 1¢ at Chicago where local stocks were below a year ago, and several cargoes remain to be loaded before the close of navigation. A weaker tone developed in the market for oats, but losses were limited to mostly 1-2¢ per bushel with some markets reporting steady prices. Best demand was for the extra heavy weights with the light oats selling at substantial discounts. Midwest barley markets were steady to up 2¢ with offerings of both feed grades and malting barley limited. West Coast markets were also held firm by support from feeding areas. Grain sorghum prices were somewhat erratic but finished lower. Kansas City reported prices off 2-4¢ per cwt. with marketings in the area quite heavy.

Good export demand for soybeans and continued heavy crushing this season failed to overcome the bearish influence of the large supply, moderately large offerings and lower prices for oil and meal. The flaxseed market advanced 2¢ at Minneapolis.

---

### Special Features

Page

Soybean prices compared with market value of soybean oil and meal .....	2
U. S. Grains: Stocks, receipts and movement from Canadian ports, October 1969 .....	7

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Nov. : 1969	Oct. : 1969	Sept. : 1969	Nov. : 1968
Soybean Oil:					
Average price at crushing plant ...	Cents per lb.	10.7	10.6	9.7	8.6
Value from bushel of soybeans <u>1/</u> ..	Dollars	1.13	1.12	1.03	.91
Soybean Meal 44%					
Bulk price at Decatur .....	Dollars per ton	70.25	75.40	72.70	71.90
Value from bushel of soybeans <u>1/</u> ..	Dollars	1.68	1.79	1.72	1.72
Value of oil and meal from bushel of soybeans <u>1/</u> .....	Dollars	2.81	2.91	2.75	2.63
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.35	2.30	2.41	2.50
Spread between soybean price and value of oil and meal .....	Cents	46	61	34	13

1/ Based on assumption that a bushel of soybeans will yield 10.6 pounds of oil and 47.8 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil, or soybean meal.

GRAINS: Export prices basis prompt or 30-day shipment, November 26, 1969  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Non-transit from the East.

<sup>4/</sup> Effective November 6 the Illinois Point price is limited to Central and East Central Illinois. The difference in price will be shown when the November average is published.

December 5, 1969

## WHEAT MARKETS STRONGER

A fairly sizeable export business in wheat firmed up prices during the week ended December 4. Cash soybeans advanced, reflecting strength in the products while other grains were somewhat mixed.

Winter wheat prices softened early in the period but by the close recovered, finishing unchanged from a week ago. Fair export business and steady domestic flour trade received credit for the recovery. Spring wheat moved up 1¢ with strong demand from all segments of the trade. Durum was mostly 1¢ higher but buyers were anxious to get some lower quality for blending, and sample grade durum was marked up 3-5¢. Soft white wheat sold at new highs for the season at Portland with aggressive buying prompted by a good round of export business with more in prospect. Rye traded at a steady level all week. Receipts are light but terminal stocks are large.

Corn markets were mostly a shade lower. Export shipments continue heavy but growers are apparently willing to sell quite freely as receipts are fairly large. Markets for oats, like those for corn, were mixed. Kansas City and Toledo reported prices up 1-2¢ while at other points prices generally eased a penny. Barley prices at Midwest markets were unchanged to down 2-4¢ from last week. Demand was slow, particularly for the intermediate qualities. West Coast markets held steady or sold slightly stronger with good feeder interest there. Harvest pressure tended to soften prices for grain sorghum, and transportation and storage problems limited trading activity. Prices were steady at Fort Worth but finished steady to down 3¢ at Kansas City.

Reduced offerings of soybeans prompted buyers to advance the cash basis at most markets. Movement into export continued heavy and the higher price for cash beans was also tied closely to the firmness in the products. Flaxseed bids were unchanged. Available stocks are about 45 per cent above a year ago.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or grain sorghum at Ft. Worth.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

\* The change in points covered in reporting soybean prices at Illinois Points increases the monthly average by around 1¢ per bushel above the old basis.

**GRAIN: Commodity Credit Corporation estimated non-committed inventory (1,000 bushels)**

## OILSEEDS UP - OTHER GRAINS MIXED

Cash grain sold mostly steady to slightly higher during the week ended December 11. Oilseeds traded mostly 2-4¢ higher at major markets and grain sorghum moved 4-8¢ per cwt. higher. The balance of the list was mixed, with winter wheat steady to up 2-3¢ while spring wheat and durum sold 1-5¢ under a week ago.

Southwest winter wheat markets were mostly steady to 1¢ higher. A moderate export business and some flour sales prompted buyers to seek supplies at those markets. Ordinary and medium spring wheats sold about steady, but 16 percent and higher proteins finished 3-6¢ lower. Durum dropped 3¢ at the low end and closed 1¢ down at the top end of the ranges. Cash soft white wheat at Pacific markets sold only a fraction under a week ago. Generous supplies and some movement out of loan took the edge off of prior weeks seasonal highs. Rye sold a penny higher. Marketing volume is at the lowest point since harvest, but mill interest was limited to replacing daily grind. Stocks are larger than last year.

Corn sold steady to 1-2¢ lower in face of rather limited rail receipts at primary markets. Buyers were finding it more difficult to book corn ahead at present levels, however, and "spot" demand was quite broad at some markets. Markets for oats were mostly steady. Only at Chicago was there any price improvement, but with no oats offered at that market. Steady to higher prices were offered for barley, but demand was limited. A 1¢ loss at Portland reflected less buying interest from California feed trade. Grain sorghum prices improved. CCC sales satisfied part of the export interest, but domestic feed demand was large and farmers were offering only limited quantities at Southwest markets.

Soybean prices finished up 2-4¢ at Midwest markets and at the close bids at Illinois points were 6¢ higher than last week. A large volume of export movement, strength in the meal near the close, and limited producer offerings, were supporting factors. Flaxseed bids were up 3¢. Marketing was limited and receipts the smallest of the crop year.

---

## Special Features

## 1969 Date of Issue

### PRICES:

Soybean prices compared with oil and meal ..... Jan. 3; Feb. 7; Feb. 28;  
Mar. 28; May 2; June 13;  
July 3; Aug. 29; Oct. 3;  
Oct. 31; Nov. 28.

Average prices received by farmers ..... Jan. 3; Feb. 7; Mar. 7;  
Apr. 3; May 2; July 11;  
Aug. 8.

Grains: Average monthly cash prices ..... July 3; Sept. 26; Oct. 3.

### INSPECTIONS:

Wheat: Inspections for export by classes, programs,  
coastal areas and country of destination ..... Jan. 10; Jan. 17; Feb. 14;  
Mar. 14; Apr. 11; May 9;  
June 13; July 11; July 18;  
Aug. 8; Sept. 12; Oct. 10;  
Nov. 14; Dec. 12.

Grains: Inspections for export by ports and areas ... Jan. 10; Jan. 17; Feb. 14;  
Mar. 14; Apr. 11; May 9;  
June 13; July 11; July 18;  
Aug. 8; Sept. 12; Oct. 10;  
Nov. 14; Dec. 12.

Wheat and Grains: Inspected receipts and shipments ... Jan. 24; Jan. 31; Feb. 7;  
Mar. 7; Mar. 14; Apr. 18;  
May 9; June 6; June 13;  
July 3; July 11; Aug. 1;  
Aug. 8; Sept. 12;  
Sept. 26; Oct. 31.

Grains: Inspections for export by grades and ports ... Jan. 17; July 18; July 25;  
Oct. 3; Oct. 10.

### U. S. IMPORTS AND EXPORTS:

Imports under Federal Seed Act ..... Aug. 22.

## SOYBEANS HIGHER -- OTHER GRAINS MIXED

Cash grain markets were featured by higher soybean prices during the week ended December 18. Other 'spot' grains were mixed but most held firm or strengthened somewhat in light trade.

Winter wheat markets were dull and inactive. Premiums were unchanged to down 1¢ at Kansas City but weakness in the option trade was reflected at Southwest markets, and closing prices were 1-3¢ lower. Spring wheat moved readily, with only the 17 per cent protein premiums 1¢ easier, and the basic Minneapolis future price was up enough to put 'spot' prices up mostly 2¢. Durum wheat, on the other hand, closed down 4¢ at the low end of the higher grades and sold 2¢ lower at the top end. Lower grades were down mostly 1¢. Soft white wheat went up 1¢ at Pacific Northwest markets in response to buying by exporters and mills who received fresh orders for wheat and flour. Rye sold steady to 1¢ better at upper Midwest markets in face of larger receipts.

Mostly steady to higher prices for corn at main markets reflected good export demand, expansion in feeding levels, and smaller receipts at some points. Good truck movement to Chicago elevators and processors satisfied a good share of the immediate needs, and prices were off 1¢ there. Steady to 1¢ higher prices were reported for oats. Receipts were light and demand was improved. Barley markets were dull and demand was very slow. Little change was noted, but the trend was easier with some of the ranges marked 2¢ lower than last week. Grain sorghum sold steady to 2¢ lower at important markets. Exporters and domestic feed mixers provided fair outlets. The lower prices were at Texas markets.

Support in the soybean market came from good export demand for beans and the products, a heavy crush rate, and a sharp advance in soybean meal. Supplies of meal were tight and soybeans finished mostly 2-3¢ higher. Bids at Illinois points finished up as much as 6¢. Flaxseed closed unchanged.

---
